“Fear and Uncertainty in a Bearish DeFi Market”

High cost of DEX liquidity forces dev teams to give huge discounts to presale and insiders

Lack of volume stops rewards for holders

Fear leads to a race to dump off tokens

Liquidity is drained

‘FairTribe’ Token Building and Liquidity Funding

CZ.cash

What is FairTribe?

FairTribe is an official branch of CZodiac that specializes in subsidizing liquidity to tokens for new and existing projects using \$CZUSD.

CZodiac's FairTribe has its own unique direction and roadmap, as well as goals that lie in tandem with CZodiac DeFi Bank. This includes the sleek craftsmanship of cz.cash, an all-in-one swap/router, charting, tracking, and information hub for quick access to all FairTribe partner projects and tokens.

Q1

- Initiate FairTribe division of CZodiac
- Begin outreach among the entire BSC community and promote unity through subsidized CZUSD fairlaunches

Q2

- Continue growing the grassroots of CZUSD and the FairTribe movement
- Create all-in-one swap/router, charting, tracking, and information hub for quick access to all FairTribe partner projects and tokens

Q3

- Initiate widespread marketing campaign to promote all FairTribe partner projects.

Q4

- Binance adoption of CZUSD and potential listings of multiple FairTribe projects

High-Yield Stabletoken CZUSD

— *WHAT IS CZUSD?*

A combination of backing assets and automatic price pegging define CZUSD. It has reduced complexity compared to other protocols.

Less complexity equates to less risk...

\$CZUSD is a stabletoken.

It is fully backed by a basket of yield bearing stablecoins.

In a bear market, you'd be hard-pressed to find a stablecoin with:

outstanding staking APRs ✓

liquidity funding for newly launched tokens ✓

automated price pegging with over 100% collateralization ✓

CZUSD is all of these...

- Currently *108% collateralization*
- *More than \$1,000,000 in liquidity*

The CZodiac Stable is extremely versatile. It is the smartest functioning stabletoken on the BSC.

FARMING & STAKING

CZodiac Farming Token - CZFarm (CZF)

CZF is used by CZodiac DeFi Bank to distribute rewards in multiple different ways. These include rewards from farming LP, staking tokens, holding CZodiac NFTs, using Chrono Pools, and more. CZF is the CZodiac community's farming and rewards token. The primary benefits for CZF are consistent rewards with a moderately stable price floor and uncapped scalability.

CZF stats:
9464 CZF holders
241,640 CZF transfers
